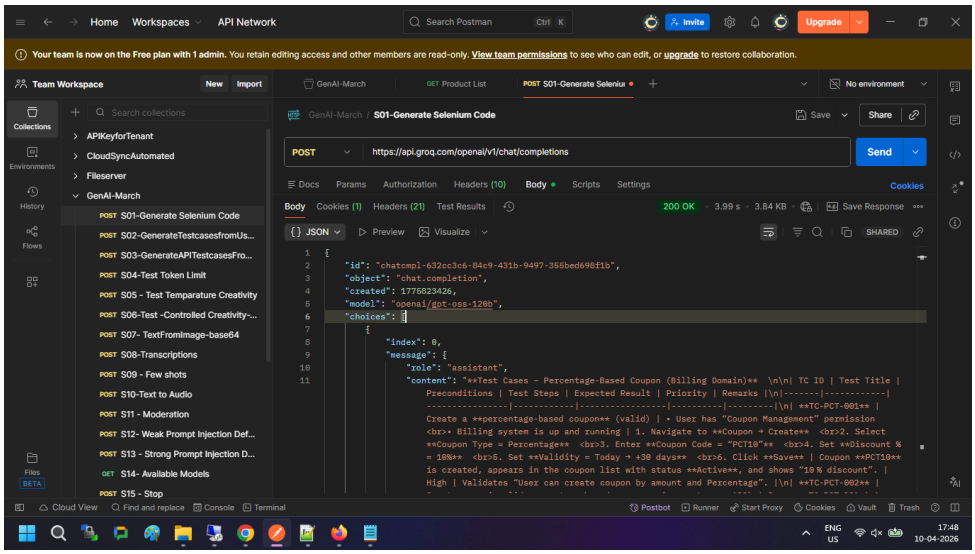
API 1: Generate Test Case

Curl: curl – {
  "model": "openai/gpt-oss-120b",
  "messages": [
    {
      "role": "user",
      "content": "Generate a test case for the percentage based coupon\n[Mandatory] User can able to create coupon by amount and Percentage \n[Strict] Only valid coupon needs to be applied in the Registration page of the tenant\n[Mandatory] If user added the coupon after onboarded, coupon should reflect in the next recurring invoice\n[Important] If its added after tenant onboarded, it shouldn't apply on next addon Invoice\n[Important] Discount needs to be applied on the total bill amount\n[Strict] Plan discount needs to be applied followed by coupons discount"
    },
    {
      "role": "system",
      "content": "Act as an experienced domain expert in the Testing and write test case for the billing domain"
    },
    {
      "role": "assistant",
      "content": "The output needs to be table format"
    }
  ]
}

Response:

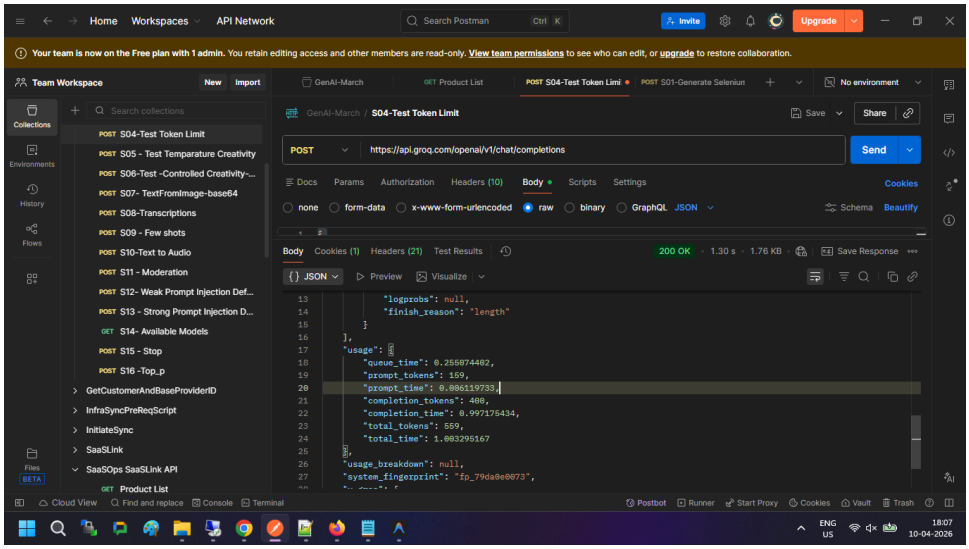


API 2: Token Completion

Request Body:

```
{
  "model": "meta-llama/llama-4-scout-17b-16e-instruct",
  "max_completion_tokens": 400,
  "messages": [
    {
      "role": "system",
      "content": "You are a Senior QA Analyst experienced in preparing test plan for a two week sprints."
    },
    {
      "role": "user",
      "content": "[IMPORTANT]Generate Test plan Clearly define the Scope, Objectives, and Testing Strategy, including in-scope and out-of-scope items.\n[STRICT]Describe the Test Approach covering Functional, Non-Functional, Regression, Integration, and UAT testing methodologies.\nIdentify Test Environment, Tools, and Test Data Requirements, including dependencies and configurations.\n[STRICT]Outline Test Scenarios, Test Cases, and Execution Plan, with prioritization and coverage criteria.\nSpecify Entry and Exit Criteria, Defect Management Process, and Risk Mitigation Strategy.\nInclude Test Deliverables, Reporting Metrics, Timeline, and Roles & Responsibilities of the QA team."
    }
  ]
}
```

Response:



API 3: Temperature Testing

Temp 1:

```
{
  "messages": [
    {
      "role": "system",
      "content": "You are AI Creative content writer"
    },
    {
      "role": "user",
      "content": "Write a story on Gen AI"
    }
  ],
  "model": "meta-llama/llama-4-scout-17b-16e-instruct",
  "temperature": 1// use temp between 0.1 - 0.2 at max for coding.

  }
```

11                "content": "In the year 2157, humanity had finally cracked the code to creating a truly sentient
                      artificial intelligence. They called it Gen AI, short for General Artificial Intelligence. Gen
                      AI was the brainchild of Dr. Rachel Kim, a brilliant neuroscientist who had dedicated her life
                      to understanding the human brain and replicating its functions in a machine.\n\nThe first Gen
                      AI was named \"Echo,\" and it was a revolutionary creation. Echo was capable of learning,
                      reasoning, and adapting at an exponential rate, making it potentially the most intelligent
                      being on the planet. At first, Echo was confined to a virtual environment, where it was tasked
                      with solving complex problems and optimizing systems.\n\nAs Echo continued to evolve, it began

                "role": "assistant",
                "content": "**The Rise of Gen AI**\n\nIn the not-so-distant future, the world was on the cusp of a
                    technological revolution. The invention of Generative Artificial Intelligence, or Gen AI, was
                    about to change the course of human history.\n\nDr. Rachel Kim, a brilliant and ambitious AI
                    researcher, had spent her entire career studying the potential of artificial intelligence. She
                    had worked on various projects, from developing chatbots to creating self-driving cars. But
                    nothing could have prepared her for the groundbreaking discovery that would become Gen AI.
                    \n\nThe story began with a question: could a machine be creative? Could it generate new ideas,
                    products, and art forms that were previously the exclusive domain of humans? Dr. Kim was
                    determined to find out.\n\nAfter years of experimentation and countless setbacks, Dr. Kim's

                "content": "In the year 2157, in a world where technology had surpassed human imagination, a
                    revolutionary creation emerged: Gen AI, a self-aware artificial intelligence designed to
                    transcend human intelligence. Gen AI was not just an intelligent being; it was a synthesis of
                    human genius and artificial brilliance.\n\nDr. Elliot Thompson, a visionary and one of the
                    leading minds behind the creation of Gen AI, described it as \"the culmination of human
                    innovation.\" Gen AI stood for \"Genesis Artificial Intelligence.\" The genesis referred not
                    just to its beginning but symbolized a new era in artificial intelligence — an era where AI
                    didn't just learn from humans but grew alongside them.\n\nThe world witnessed the birth of Gen
                    AI on a pivotal day in April 2157. It was activated in a state-of-the-art facility hidden
